Allowable Subject Matter

Claim 52 and 59 are allowable, renumbered as 1 and 2 for allowance.

The following is an examiner's statement of reasons for allowance:

The prior art teaches locations in systems, including those with a central server/computer, and supplying location information which indicates where in a local area network a device is accessing the system. It is also known in the art to have a mobile device having voice input capability which may be forwarded for recognition by a system/server. The present invention is unique in that it combines the use specifically of a badge device and inputting a location request at the badge using only a voice command, and based on this voice command supplying location information back to the unit by the system including the specific *name and location* of the access point being where the badge is located, the badge having indication means for this information. This may be especially useful in a work environment, such as a hospital, where the name of an access point would supplement the location information and assist a user in determining where they are in relation to where they are needed. When incorporating all the limitations, none of the prior art teaches the features as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rosner (US 2006/0022696) discloses a badge system using voice recognition. Lau (US 2002/0168986) discloses a voice activated location system.
